Journal of ALLOYS AND COMPOUNDS

Subject Index of Volume 219

Ab initio structure solution
the *ab initio* structure determination of $[(CH_3)_4N]_2Ge_4MnS_{10}$ from X-ray powder diffraction data, 111
A.c. susceptibility
studies of the magnetic phase diagram of the $U(Ni_{1-x}Cu_x)_2Si_2$ system, 244
Actinide compounds
the discovery of the ferromagnetism in $U(H,D)_3$: 40 years later, 1
Actinides
progress on solid compounds of actinides, 232
studies of the magnetic phase diagram of the $U(Ni_{1-x}Cu_x)_2Si_2$ system, 244
the crystal field and exchange interactions in $NdNi_5$, UGa_2 and UPd_2Al_3, 260
Alkaline earths
equiatomic ternary phases formed by alkaline earths and rare earths, 63
Anisotropies
anisotropies of the electrical resistivity and Hall effect in UAsSe, 248
Antiferromagnetism
electrical resistivity and magnetic phase transitions in modified FeRh compounds, 139
antiferromagnetic behaviour of a novel single-crystal uranium compound $U_{2.67}Te_4$, 264

Borides
some crystal chemistry relationships in eutectic cocrystallization of d- and f-transition metal borides, 116

Cesium–metal–tellurium compounds
new one-dimensional ternary and quaternary cesium–metal–tellurium compounds, 59
Chalcogenides
charge density waves in some Nb and Ta chalcogenides, 69
Charge density waves
charge density waves in some Nb and Ta chalcogenides, 69
Charge transfer
charge transfer between layers in misfit layer compounds, 152
Chemical bond
effect of the vanadium content on the rare earth anisotropy behaviour in $DyFe_{12-x}V_x$ compounds, 199
Chemical bonding
titanium carbonitrides, Ti(C,N): electronic structure and chemical bonding, 303
Chemical composition
the single crystals $Cu_{1-x}Zn_xCr_2Se_4$, 100
Chemical transport
the single crystals $Cu_{1-x}Zn_xCr_2Se_4$, 100
Chemical vapour transport
preparation and properties of FeSi, α-$FeSi_2$ and β-$FeSi_2$ single crystals, 93
growth of $Cu_xIn_{2/3(1-x)}Cr_2Se_4$ four-element single crystals by chemical vapour transport and their properties, 97
Chromium
growth of $Cu_xIn_{2/3(1-x)}Cr_2Se_4$ four-element single crystals by chemical vapour transport and their properties, 97
Chromium chalcogenides
lattice dynamics of spinel-type chlorides, oxides, sulphides and selenides, 103
Cluster compounds
transition metal chalcogenides: new views on an old topic, 73
Copper
growth of $Cu_xIn_{2/3(1-x)}Cr_2Se_4$ four-element single crystals by chemical vapour transport and their properties, 97
Crystal chemistry
crystal chemistry of ternary intermetallic compounds of scandium with transition metals and carbon, silicon or germanium, 88
Crystal field effects
reliability of conventional crystal field models in f-electron systems, 238
the crystal field and exchange interactions in $NdNi_5$, UGa_2 and UPd_2Al_3, 260
Crystal fields
magnetic properties of $TlLnS_2$ compounds (Ln ≡ Tb, Ho and Tm), 189
Crystal structure
role of the (H,C,N) interstitial elements on the magnetic properties of iron–rare earth permanent magnet alloys, 16
hydrogen absorption and phase structural characteristics of oxygen-containing Zr–V alloys substituted by Hf, Ti, Nb, Fe, 34
high pressure synthesis and structure of Na_2PtH_6, 45
crystal structures and ionic conductivities of new silver hafnium sulfides, 55
crystal structure of $Fe_4Ti_{0.93}Al_{12.07}$, a substitutional variant of the Fe_4Al_{13} structure type, 135
peculiarities of the interaction of ytterbium with transition metals (Cr,Mn) and aluminium, 219
$CeNi_3$-type ternary phases in the R–Ni–Ga systems (R ≡ Y, Pr, Nd, Sm, Gd, Tb, Dy, Ho, Er, Tm, Yb, Lu), 222
crystal structures of several ternary lanthanoid and actinoid ruthenium carbides, 279

de Haas van Alphen effect
purification of USb and its de Haas van Alphen effect, 252
Displaced centres
non-integral expansion method of $f(R)Y_L^M(\Theta,\Phi)$ functions about a displaced centre, 316
Dodecaborides
transition and rare earth element dodecaborides, 215

Early transition metal chalcogenides
transition metal chalcogenides: new views on an old topic, 73

Elsevier Science S.A.

Electrical properties
cascade of phase transitions in $Tm_{1-x}Sm_xS$ due to Tm and Sm valence changes, 168
Electrical resistance
transition and rare earth element dodecaborides, 215
Electrical resistivity
anisotropies of the electrical resistivity and Hall effect in UAsSe, 248
transport properties of the ferromagnets UCoSn, URuSn, URhSn and UIrSn, 285
Electric field gradient
electric field gradient and its temperature variation at a ^{181}Ta probe in Zr_2Fe and Zr_2Co intermetallic compounds, 124
Electron densities
titanium carbonitrides, Ti(C,N): electronic structure and chemical bonding, 303
Electronic structure
recent investigations of the electronic structure of hydrides of intermetallic compounds, 6
misfit layered compounds: polytypism, multilayer stages, non-stoichiometry and electronic structure, self-misfit compounds, 157
electronic structure of VCo_3 and VFe_3, 299
titanium carbonitrides, Ti(C,N): electronic structure and chemical bonding, 303
f-Electron system
reliability of conventional crystal field models in f-electron systems, 238
Electroresistivity
phase diagram of the holmium–silicon binary system and physical properties of holmium silicides up to 1050 °C, 181
Energy band
superconductivity and magnetism in In-doped lead–tin tellurides, 313
Energy gap
vortex lattice states of p-wave superconductors in a quantizing magnetic field, 307
Eutectic crystallization
some crystal chemistry relationships in eutectic cocrystallization of d- and f-transition metal borides, 116

Ferromagnetism
the discovery of the ferromagnetism in $U(H,D)_3$: 40 years later, 1
Ferromagnets
transport properties of the ferromagnets UCoSn, URuSn, URhSn and UIrSn, 285
First-order magnetic phase transition
electrical resistivity and magnetic phase transitions in modified FeRh compounds, 139
Floating zone method
transition and rare earth element dodecaborides, 215
Flux reactions
transition metal chalcogenides: new views on an old topic, 73
Frustration
magnetic and resistivity studies of $GdNi_2Sn_2$, $GdCu_2Sb_2$ and $GdNi_2Sb_2$ compounds, 208

Giant magnetoresistance
electrical resistivity and magnetic phase transitions in modified FeRh compounds, 139

Hall effect
anisotropies of the electrical resistivity and Hall effect in UAsSe, 248
Heat capacity
low temperature heat capacity measurements of U_6FeH_{15} hydride, 41
High-field magnetization
high-field magnetization of $DyFe_4Al_8$ single-crystal, 225
High-pressure synthesis
high pressure synthesis and structure of Na_2PtH_6, 45
High T_c superconductors
influence of hydrogen on 123 and 124 HT_c superconductors studied by Cu NMR and NQR, 29
Holmium silicides
phase diagram of the holmium–silicon binary system and physical properties of holmium silicides up to 1050 °C, 181
Homogeneity ranges
$CeNi_3$-type ternary phases in the R–Ni–Ga systems (R ≡ Y, Pr, Nd, Sm, Gd, Tb, Dy, Ho, Er, Tm, Yb, Lu), 222
Hydrides
low temperature heat capacity measurements of U_6FeH_{15} hydride, 41
phase stability and neutron diffraction studies of Laves phases $Zr(Cr_{1-x}M_x)_2$ with M = Mn, Fe, Co, Ni, Cu and $0 < x < 0.2$ and their hydrides, 48
Hydrogen
influence of hydrogen on 123 and 124 HT_c superconductors studied by Cu NMR and NQR, 29
hydrogen absorption and phase structural characteristics of oxygen-containing Zr–V alloys substituted by Hf, Ti, Nb, Fe, 34
Hydrogen absorption
magnetic properties of single-crystal β phase hydrides $RCo_5H_{\sim 3}$, 25
Hydrogenation
oxide-modified Zr–Fe alloys: thermodynamic calculations, X-ray analysis and hydrogen absorption properties, 38
Hydrothermal synthesis
the *ab initio* structure determination of $[(CH_3)_4N]_2Ge_4MnS_{10}$ from X-ray powder diffraction data, 111
Hyperfine interaction
Mössbauer studies of $Tb_xDy_{1-x}Fe_2$, 203

Indium
growth of $Cu_xIn_{2/3(1-x)}Cr_2Se_4$ four-element single crystals by chemical vapour transport and their properties, 97
Intermetallic compounds
recent investigations of the electronic structure of hydrides of intermetallic compounds, 6
equiatomic ternary phases formed by alkaline earths and rare earths, 63
crystal chemistry of ternary intermetallic compounds of scandium with transition metals and carbon, silicon or germanium, 88
electric field gradient and its temperature variation at a ^{181}Ta probe in Zr_2Fe and Zr_2Co intermetallic compounds, 124
crystal structure of $Fe_4Ti_{0.93}Al_{12.07}$, a substitutional variant of the Fe_4Al_{13} structure type, 135
mechanism of formation of Ni–Sc intermetallic compound layers on a nickel surface in molten halides, 149
Intermetallics
Mössbauer studies of $Tb_xDy_{1-x}Fe_2$, 203
Interstitial hydrogen
effect of interstitial hydrogen and nitrogen on magnetic and structural properties of R_2T_{17} (R ≡ Y, Ce and Sm; T ≡ Fe, Co and Ni), 10
Interstitial nitrogen
effect of interstitial hydrogen and nitrogen on magnetic and structural properties of R_2T_{17} (R ≡ Y, Ce and Sm; T ≡ Fe, Co and Ni), 10
Ionic conductivity
crystal structures and ionic conductivities of new silver hafnium sulfides, 55

Ionicities
lattice dynamics of spinel-type chlorides, oxides, sulphides and selenides, 103
Isothermal section
peculiarities of the interaction of ytterbium with transition metals (Cr,Mn) and aluminium, 219
Itinerant magnetism
electrical resistivity and magnetic phase transitions in modified FeRh compounds, 139

Kondo systems
cascade of phase transitions in $Tm_{1-x}Sm_xS$ due to Tm and Sm valence changes, 168
Kramers degeneracy
the crystal field and exchange interactions in $NdNi_5$, UGa_2 and UPd_2Al_3, 260

Lanthanum hexaboride
features of the real structure of lanthanum hexaboride single crystals, 228
Lattice deformation
magnetic properties of $TlLnS_2$ compounds (Ln ≡ Tb, Ho and Tm), 189
Lattice dynamics
lattice dynamics of spinel-type chlorides, oxides, sulphides and selenides, 103
Lattice parameters
magnetic properties of RPdSn and RPdSb compounds, 185
$CeNi_3$-type ternary phases in the R–Ni–Ga systems (R ≡ Y, Pr, Nd, Sm, Gd, Tb, Dy, Ho, Er, Tm, Yb, Lu), 222
Laudau quantization
vortex lattice states of p-wave superconductors in a quantizing magnetic field, 307
Low-dimensional compounds
transition metal chalcogenides: new views on an old topic, 73

Magnetic fields
magnetic properties of UMn_xAl_{12-x} alloys, 275
Magnetic low carrier density systems
magnetic polarons in magnetic low carrier density systems, 290
Magnetic moment
magnetic properties of single-crystal β phase hydrides $RCo_5H_{\sim 3}$, 25
Magnetic ordering
^{57}Fe Mössbauer effect in UFe_xAl_{12-x} system, 271
Magnetic phase diagrams
studies of the magnetic phase diagram of the $U(Ni_{1-x}Cu_x)_2Si_2$ system, 244
Magnetic phase transitions
low temperature heat capacity measurements of U_6FeH_{15} hydride, 41
Magnetic polaron
magnetic polarons in magnetic low carrier density systems, 290
Magnetic properties
role of the (H,C,N) interstitial elements on the magnetic properties of iron–rare earth permanent magnet alloys, 16
the single crystals $Cu_{1-x}Zn_xCr_2Se_4$, 100
magnetic and resistivity studies of $GdNi_2Sn_2$, $GdCu_2Sb_2$ and $GdNi_2Sb_2$ compounds, 208
magnetic properties of UMn_xAl_{12-x} alloys, 275
Magnetic structures
skewed spiral magnetic structure in $ErMn_6Ge_6$, 211
studies of the magnetic phase diagram of the $U(Ni_{1-x}Cu_x)_2Si_2$ system, 244
^{119}Sn Mössbauer studies of the $UCu_{1+x}Sn_{1-x}$ ($x = 0$, 0.1) system, 256
Magnetic susceptibility
role of the (H,C,N) interstitial elements on the magnetic properties of iron–rare earth permanent magnet alloys, 16
magnetic properties of RPdSn and RPdSb compounds, 185
antiferromagnetic behaviour of a novel single-crystal uranium compound $U_{2.67}Te_4$, 264
f Magnetism
the crystal field and exchange interactions in $NdNi_5$, UGa_2 and UPd_2Al_3, 260
Magnetism
effect of interstitial hydrogen and nitrogen on magnetic and structural properties of R_2T_{17} (R ≡ Y, Ce and Sm; T ≡ Fe, Co and Ni), 10
Mössbauer studies of $Tb_xDy_{1-x}Fe_2$, 203
Magnetization
magnetic properties of RPdSn and RPdSb compounds, 185
Magnetization measurements
growth of $Cu_xIn_{2/3(1-x)}Cr_2Se_4$ four-element single crystals by chemical vapour transport and their properties, 97
Magnetocrystalline anisotropy
magnetic properties of single-crystal β phase hydrides $RCo_5H_{\sim 3}$, 25
effect of the vanadium content on the rare earth anisotropy behaviour in $DyFe_{12-x}V_x$ compounds, 199
Magnetoelastic effects
virtual bound state contribution to the magnetic moment of an ion in a multilayered system, 296
Magneto-optic materials
crystal growth and optical properties of rare earth sesquiselenides and sesquisulphides — new magneto-optic materials, 172
Magnetoresistivity
transport properties of the ferromagnets UCoSn, URuSn, URhSn and UIrSn, 285
Magnetostriction
magnetostriction of UNiGa at metamagnetic transition, 267
Metal hydrides
recent investigations of the electronic structure of hydrides of intermetallic compounds, 6
Metallic multilayers
virtual bound state contribution to the magnetic moment of an ion in a multilayered system, 296
Metamagnetism
magnetostriction of UNiGa at metamagnetic transition, 267
Microporous structures
transition metal chalcogenides: new views on an old topic, 73
Microporous thiogermanate
the *ab initio* structure determination of $[(CH_3)_4N]_2Ge_4MnS_{10}$ from X-ray powder diffraction data, 111
Misfit layer compounds
charge transfer between layers in misfit layer compounds, 152
Mixed layers
mixed layers in $M_xTa_{1-x}Se_2$ (M = Re,Os; $0 < x < 1$), 161
Molten salts
mechanism of formation of Ni–Sc intermetallic compound layers on a nickel surface in molten halides, 149
Mössbauer effect
Mössbauer studies of $Tb_xDy_{1-x}Fe_2$, 203
^{57}Fe Mössbauer effect in UFe_xAl_{12-x} system, 271
Mössbauer studies
^{119}Sn Mössbauer studies of the $UCu_{1+x}Sn_{1-x}$ ($x = 0$, 0.1) system, 256
Multilayers
misfit layered compounds: polytypism, multilayer stages, non-stoichiometry and electronic structure, self-misfit compounds, 157

Neutron diffraction
role of the (H,C,N) interstitial elements on the magnetic properties of iron–rare earth permanent magnet alloys, 16
high pressure synthesis and structure of Na_2PtH_6, 45
phase stability and neutron diffraction studies of Laves phases $Zr(Cr_{1-x}M_x)_2$ with M = Mn, Fe, Co, Ni, Cu and $0 < x < 0.2$ and their hydrides, 48
studies of the magnetic phase diagram of the $U(Ni_{1-x}Cu_x)_2Si_2$ system, 244
Neutron powder diffraction
skewed spiral magnetic structure in $ErMn_6Ge_6$, 211
Nickel
mechanism of formation of Ni–Sc intermetallic compound layers on a nickel surface in molten halides, 149
Niobium
charge density waves in some Nb and Ta chalcogenides, 69
Nitriding processes
scanning electron microscopy studies of nitriding processes in Nd_2Fe_{17}, 193
Non-integral expansion
non-integral expansion method of $f(R)Y_L^M(\Theta,\Phi)$ functions about a displaced centre, 316
Nuclear magnetic resonance
influence of hydrogen on 123 and 124 HT_c superconductors studied by Cu NMR and NQR, 29
Nuclear quadrupole resonance
influence of hydrogen on 123 and 124 HT_c superconductors studied by Cu NMR and NQR, 29

Perturbed angular correlations
electric field gradient and its temperature variation at a ^{181}Ta probe in Zr_2Fe and Zr_2Co intermetallic compounds, 124
Phase composition
hydrogen absorption and phase structural characteristics of oxygen-containing Zr–V alloys substituted by Hf, Ti, Nb, Fe, 34
Phase diagrams
phase diagram of the holmium–silicon binary system and physical properties of holmium silicides up to 1050 °C, 181
peculiarities of the interaction of ytterbium with transition metals (Cr,Mn) and aluminium, 219
Phase equilibria
crystal structures of several ternary lanthanoid and actinoid ruthenium carbides, 279
Phase stability
phase stability and neutron diffraction studies of Laves phases $Zr(Cr_{1-x}M_x)_2$ with M = Mn, Fe, Co, Ni, Cu and $0 < x < 0.2$ and their hydrides, 48
electronic structure of VCo_3 and VFe_3, 299
Phase transformations
stabilization of cubic scandium dodecaboride, 119
Phase transitions
magnetic properties of RPdSn and RPdSb compounds, 185
Platinum metal monosilicides
structure refinements for some platinum metal monosilicides, 107
Polytypes
misfit layered compounds: polytypism, multilayer stages, non-stoichiometry and electronic structure, self-misfit compounds, 157
Powder diffraction
the *ab initio* structure determination of $[(CH_3)_4N]_2Ge_4MnS_{10}$ from X-ray powder diffraction data, 111

Quasilocal impurity state
superconductivity and magnetism in In-doped lead–tin tellurides, 313

Rare earth chalcogenides
crystal growth and optical properties of rare earth sesquiselenides and sesquisulphides — new magneto-optic materials, 172
Rare earth compounds
magnetic properties of RPdSn and RPdSb compounds, 185
effect of the vanadium content on the rare earth anisotropy behaviour in $DyFe_{12-x}V_x$ compounds, 199
Rare earth metals
magnetic properties of single-crystal β phase hydrides $RCo_5H_{\sim 3}$, 25
Rare earths
equiatomic ternary phases formed by alkaline earths and rare earths, 63
Reactive flux method
new one-dimensional ternary and quaternary cesium–metal–tellurium compounds, 59
Refractory materials
titanium carbonitrides, Ti(C,N): electronic structure and chemical bonding, 303
Resistivity
magnetic and resistivity studies of $GdNi_2Sn_2$, $GdCu_2Sb_2$ and $GdNi_2Sb_2$ compounds, 208
$CeNi_3$-type ternary phases in the R–Ni–Ga systems (R ≡ Y, Pr, Nd, Sm, Gd, Tb, Dy, Ho, Er, Tm, Yb, Lu), 222
Resonant impurity band
indium quasi-local level and superconductivity in $Ge_zSn_{1-z}Te$:In, 310
Rietveld refinement
the *ab initio* structure determination of $[(CH_3)_4N]_2Ge_4MnS_{10}$ from X-ray powder diffraction data, 111
Ruthenium carbides
crystal structures of several ternary lanthanoid and actinoid ruthenium carbides, 279

Scandium
crystal chemistry of ternary intermetallic compounds of scandium with transition metals and carbon, silicon or germanium, 88
mechanism of formation of Ni–Sc intermetallic compound layers on a nickel surface in molten halides, 149
Scandium dodecaboride
stabilization of cubic scandium dodecaboride, 119
Scanning electron microscopy
scanning electron microscopy studies of nitriding processes in Nd_2Fe_{17}, 193
Selenium
growth of $Cu_xIn_{2/3(1-x)}Cr_2Se_4$ four-element single crystals by chemical vapour transport and their properties, 97
Silver hafnium sulfides
crystal structures and ionic conductivities of new silver hafnium sulfides, 55
Single crystal real structure
features of the real structure of lanthanum hexaboride single crystals, 228
Single crystals
magnetic properties of single-crystal β phase hydrides $RCo_5H_{\sim 3}$, 25
preparation and properties of FeSi, α-$FeSi_2$ and β-$FeSi_2$ single crystals, 93
high-field magnetization of $DyFe_4Al_8$ single-crystal, 225
Skewed spiral
skewed spiral magnetic structure in $ErMn_6Ge_6$, 211
Solid solutions
cascade of phase transitions in $Tm_{1-x}Sm_xS$ due to Tm and Sm valence changes, 168

indium quasi-local level and superconductivity in $Ge_zSn_{1-z}Te$:In, 310
superconductivity and magnetism in In-doped lead–tin tellurides, 313
Solvothermal reactions
transition metal chalcogenides: new views on an old topic, 73
Spinel structure
lattice dynamics of spinel-type chlorides, oxides, sulphides and selenides, 103
Spin reorientation
effect of the vanadium content on the rare earth anisotropy behaviour in $DyFe_{12-x}V_x$ compounds, 199
Stabilization
stabilization of cubic scandium dodecaboride, 119
Stacking sequences
electronic structure of VCo_3 and VFe_3, 299
Stoichiometry
misfit layered compounds: polytypism, multilayer stages, non-stoichiometry and electronic structure, self-misfit compounds, 157
crystal growth and optical properties of rare earth sesqui-selenides and sesquisulphides — new magneto-optic materials, 172
Structural properties
effect of interstitial hydrogen and nitrogen on magnetic and structural properties of R_2T_{17} (R ≡ Y, Ce and Sm; T ≡ Fe, Co and Ni), 10
Structure determination
structure of thin films of titanium nitride, 83
Structure refinements
structure refinements for some platinum metal monosilicides, 107
Substitution variant
crystal structure of $Fe_4Ti_{0.93}Al_{12.07}$, a substitutional variant of the Fe_4Al_{13} structure type, 135
Superconductivity
vortex lattice states of p-wave superconductors in a quantizing magnetic field, 307
indium quasi-local level and superconductivity in $Ge_zSn_{1-z}Te$:In, 310
superconductivity and magnetism in In-doped lead–tin tellurides, 313
Synthesis
progress on solid compounds of actinides, 232

Tantalum
charge density waves in some Nb and Ta chalcogenides, 69
Temperature dependence
phase diagram of the holmium–silicon binary system and physical properties of holmium silicides up to 1050 °C, 181
Ternary lanthanide sulphides
magnetic properties of $TlLnS_2$ compounds (Ln ≡ Tb, Ho and Tm), 189
Ternary metal hydrides
high pressure synthesis and structure of Na_2PtH_6, 45
Ternary phases
ceNi_3-type ternary phases in the R–Ni–Ga systems (R ≡ Y, Pr, Nd, Sm, Gd, Tb, Dy, Ho, Er, Tm, Yb, Lu), 222
Thermal conductivity
transition and rare earth element dodecaborides, 215
Thermal expansion
phase diagram of the holmium–silicon binary system and physical properties of holmium silicides up to 1050 °C, 181
Thermodynamic calculations
oxide-modified Zr–Fe alloys: thermodynamic calculations, X-ray analysis and hydrogen absorption properties, 38
Thermomagnetic effect
high-field magnetization of $DyFe_4Al_8$ single-crystal, 225
Thin films
structure of thin films of titanium nitride, 83
Thiophosphates
transition metal chalcogenides: new views on an old topic, 73
Titanium carbonitrides
titanium carbonitrides, Ti(C,N): electronic structure and chemical bonding, 303
Titanium nitride
structure of thin films of titanium nitride, 83
Transition metal dichalcogenides
mixed layers in $M_xTa_{1-x}Se_2$ (M = Re, Os; $0 < x < 1$), 161
Transition metals
magnetic properties of single-crystal β phase hydrides $RCo_5H_{\sim 3}$, 25
crystal chemistry of ternary intermetallic compounds of scandium with transition metals and carbon, silicon or germanium, 88
magnetic and resistivity studies of $GdNi_2Sn_2$, $GdCu_2Sb_2$ and $GdNi_2Sb_2$ compounds, 208
Transport properties
transport properties of the ferromagnets UCoSn, URuSn, URhSn and UIrSn, 285

Uranium
^{119}Sn Mössbauer studies of the $UCu_{1+x}Sn_{1-x}$ ($x = 0$, 0.1) system, 256
antiferromagnetic behaviour of a novel single-crystal uranium compound $U_{2.67}Te_4$, 264
Uranium compounds
magnetic properties of UMn_xAl_{12-x} alloys, 275
Uranium intermetallics
magnetostriction of UNiGa at metamagnetic transition, 267
Uranium monopnictides
purification of USb and its de Haas van Alphen effect, 252

Virtual bound state
virtual bound state contribution to the magnetic moment of an ion in a multilayered system, 296

Wigner crystal
magnetic polarons in magnetic low carrier density systems, 290

X-ray analysis
oxide-modified Zr–Fe alloys: thermodynamic calculations, X-ray analysis and hydrogen absorption properties, 38
X-ray diffraction
the single crystals $Cu_{1-x}Zn_xCr_2Se_4$, 100
antiferromagnetic behaviour of a novel single-crystal uranium compound $U_{2.67}Te_4$, 264

Zinc chloride
lattice dynamics of spinel-type chlorides, oxides, sulphides and selenides, 103
Zirconium alloys
hydrogen absorption and phase structural characteristics of oxygen-containing Zr–V alloys substituted by Hf, Ti, Nb, Fe, 34
oxide-modified Zr–Fe alloys: thermodynamic calculations, X-ray analysis and hydrogen absorption properties, 38
